

*Dear Guest,*

*At the EarthSpirit centre we are very aware of the fragile state of our global environment and are working to reduce our ecological impact. We'd love to share some of this story with you if you are interested. There's information on what we're doing.*

*We also hope you will help us in this. Here are some of the things we hope our guests will bear in mind when they visit:-*

- 1) Minimising the carbon emissions for your journey to the centre, where possible, by sharing cars or taking public transport. The 'getting here' section of this website has public transport options.*
- 2) Minimising and re-cycling your waste when you are here, using the re-cycling bins in the tea room.*
- 3) Charging phones, computers etc during the day when there is good light, to take advantage of our solar PV generated electricity.*
- 4) Only using the electricity you really need, turning off lights which are not needed. We ask each group to appoint a light monitor to help with this.*
- 5) Keeping doors and windows closed, if it's not too stifling, to minimise heat loss during the winter.*
- 6) Reading the Guest Information sheet in your room when you arrive, and the Green Tourism management file in the entrance lobby.*
- 7) Sharing good practice. Telling others what you are doing..*
- 8) Enjoying your environment. Notice use of natural materials, craftsmanship etc.*
- 9) Seeing what wildlife you can spot, and letting us know if you see anything unusual.*

*I trust you enjoy your stay*

*With best wishes, David*

*David Taylor, Manager*
